- (14) AN EXTRAORDINARY EVENT !!!

There appeared above us circling in the sky a bird with a white head, white under parts, wings dark above and particolored below, hawklike bill, and a deeply forked tail. It was instantly identified by all present as a Swallow-tailed Kite. Great excitement of course was felt by all, and we shall not soon forget the wonderful thrill. The bird remained in sight for from one to two minutes allowing ample time to verify all of our observations.
